

Condensation

Precipitation

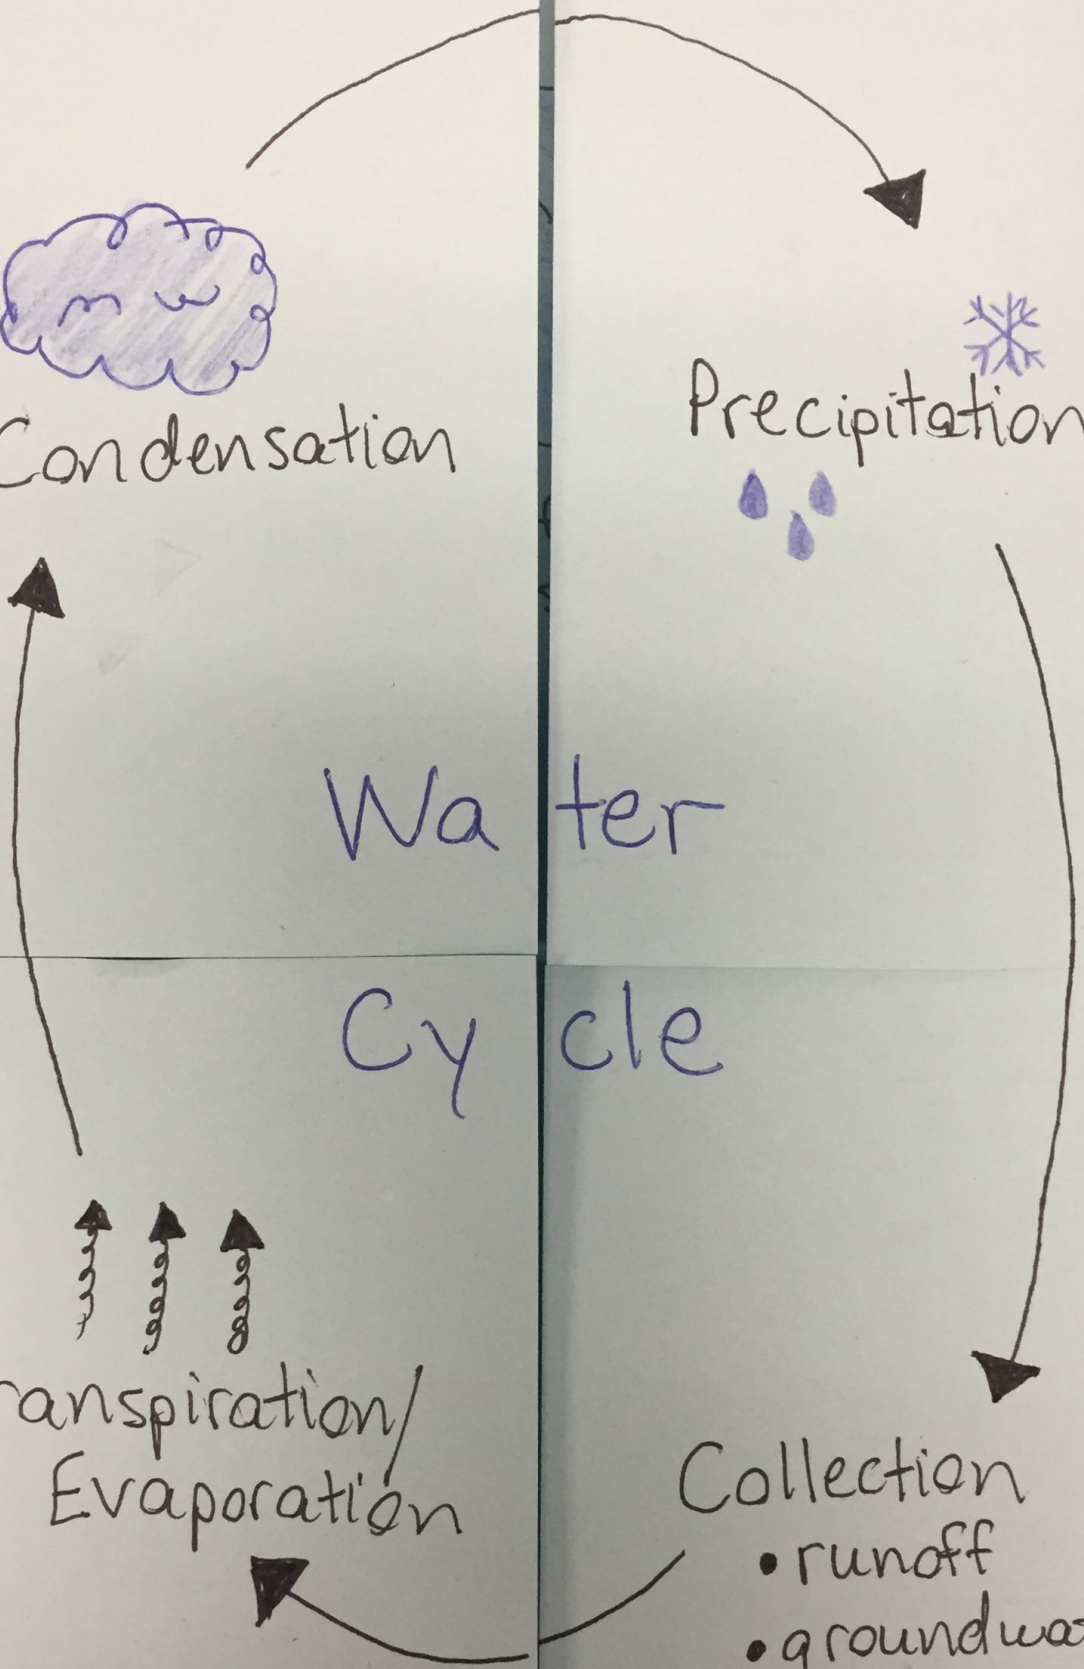

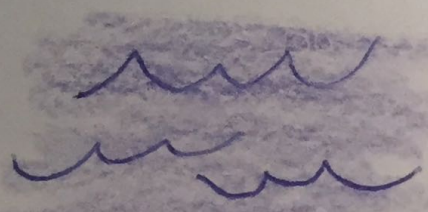

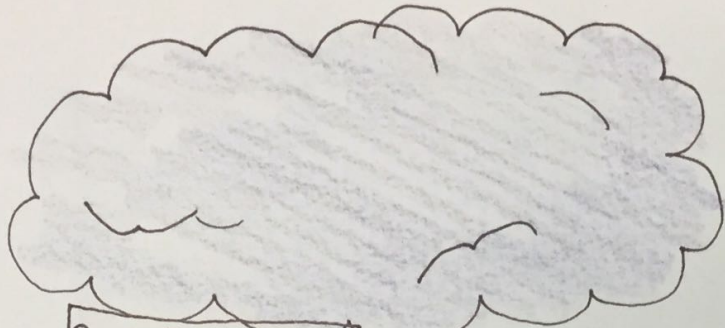

Water Cycle

Transpiration/
Evaporation

Collection
• runoff
• groundwater

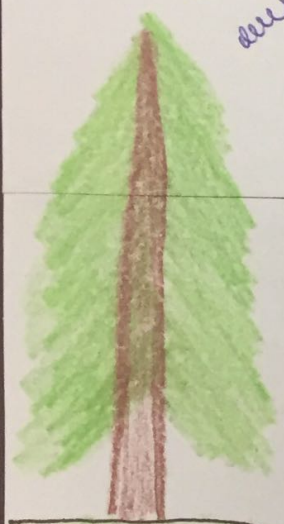

Condensation - change of water from vapor (gas) to liquid.

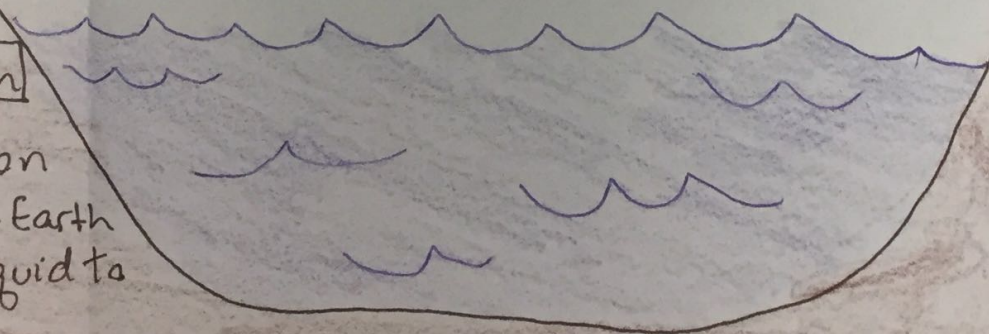

Transpiration - liquid water from the ground is turned into water vapor by plants (using photosynthesis)

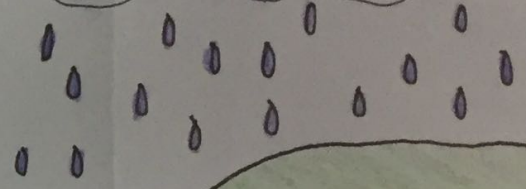

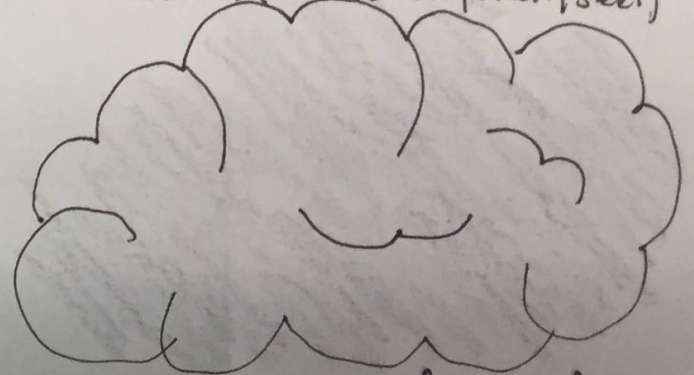

Evaporation

Water warmed on the surface of the Earth changes from liquid to vapor (gas)

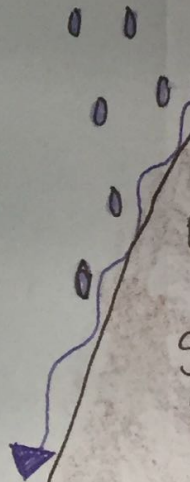

Precipitation - water that falls from the atmosphere to land and oceans (rain, snow, hail, sleet)

Runoff -

Precipitation that falls on land and then goes into lakes, rivers, & oceans.

Groundwater - water that is stored within or between rocks.
